Issue Date	12 May 2019	

### Market Commentary

The JSE All Share Index was up 4.23% for the month of April, driven by most sectors except the resources sector. Foreigners were net sellers of our local equities with outflows of approximately R 4.6 bn for the month. The All Bond Index (ALBI) was up 0.80% and the property index (J253T) returned 3.17%. Inflation-linked bonds delivered 3.34% and cash returned 0.63% for the month. Annual consumer price inflation was 4.50 YoY in March, up from 4.20% in February. The local currency finished the month 0.90% weaker against the dollar at 14.34. Offshore, developed equity markets (MSCI World USD) outperformed emerging markets (MSCI EM USD) during the month recording +ve 3.60% and +ve 2.12% respectively.

### Fund Universe

The fund will, apart from assets in liquid form, consist solely of participatory interests in portfolios of Collective Investment Schemes investing in equities, bonds, property and money market instruments.

### Investment Strategy

The Deton Prime Stable Fund of Funds aims at protecting capital over a rolling 12 month period while providing upside exposure to the equity and fixed income markets. The fund has a capital preservation focus, with an asset allocation strategy that seeks to minimise the risk of drawdown. The fund uses a passive core and actively managed satellites as it seeks to establish a risk controlled solution while aiming at outperformance in the longer term. While the Prime Stable FoFs subscribes to a low cost philosophy, it also makes use of well researched skilled active managers as

### Who should be investing ?

The fund is suitable for those investors who :

- Require a steady income stream with limited exposure to volatile capital growth assets (equities).
- Seek stable return for their retirement annuity, pension or provident

### Distributions (cpu)

Month	Dividend	Interest	Other	Total
February	0.1130	2.0810	0.1177	2.3117
August	0.0828	3.0543	0.0958	3.2329

### Fund Net Asset Value (NAV) and Units in Issue

Month	Feb 19	Mar 19	Apr 19
Fund Units	104 009 645	105 817 293	104 727 051
Fund NAV	R 112 263 498	R 112 429 919	R 112 241 173
Class NAV	R 24 252 041	R 24 277 375	R 24 243 813

### TER and TC : Jan 2018 - Dec 2018 ( 1 Yr Rolling %)

**Total Expense Ratio (TER)** 1.93%

Expenses related to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

**Performance Fees** n/a

**VAT** 0.29%

**Transaction Costs (TC) (incl. VAT)** 0.01%

Costs relating to the buying and selling of the assets underlying the Financial Product.

**Total Investment Charges (TIC)** 2.23%

Transaction costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the Investment decisions of the investment manager and the TER.

### Fee Structure (incl. in TIC)

**Management Fee** 0.38% (excl. VAT)

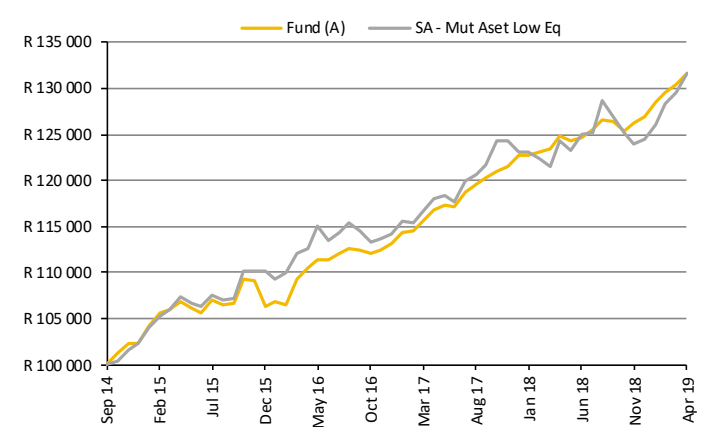

**Advisory Fee** 0.35% (excl. VAT)

**Investment Mgmt. Fee** 0.60% (excl. VAT)

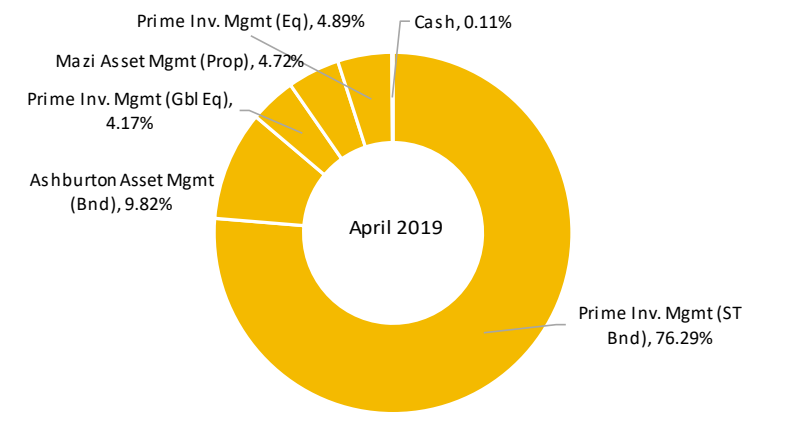

**Performance Fee** Not Applicable

**Glossary of Terms**

**Volatility** is a statistical measure of the dispersion of returns for a given security or market index.

**Tracking error** is a measure of the risk in an investment portfolio that is due to active management decisions made by the portfolio manager; it indicates how closely a portfolio follows the index to which it is benchmarked.

**Information ratio** is a measure of the risk-adjusted return of a portfolio. In this case, it measures the active return of the manager's portfolio divided by the amount of risk that the manager takes relative to the benchmark.

**Sharpe Ratio** is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance has been (i.e. a higher return with a contained risk profile, where the portfolio manager is not taking excessive risk to achieve those returns).

**Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

**Alpha** is a measure of the active return on an investment. It represents the excess returns of a fund relative to the return of a suitable benchmark.

**Disclaimer**

This is a minimum disclosure document and a general investor report. Collective Investment Schemes are generally medium to long term investments. The value of participatory interests may go down as well as up. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CIS's are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the manager. The manager has a right to close portfolios to new investors in order to manage them more efficiently in accordance with their mandates. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Lump sum investment performances are quoted. Income distributions are in the calculations. Performance numbers and graphs are sourced from Collective Endeavours Consulting (Pty) Ltd. NAV to NAV figures have been used. The investment performance is for illustrative purposes only. The investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. One can also obtain additional information on Prime products on the Prime CIS website and all price related queries or information is readily available on request. Fund of funds are portfolios that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds. The daily cut off time is 14:00 for trades and the valuation point is 22:00. Prices are published on Finswitch by 10:00 daily. Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd is a registered Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a wholly owned subsidiary of Prime Financial Services (Pty) Ltd, a member of ASISA.
